TITLE	Women and Minorities in Maine's Labor Force. Publication Series No. WM-8.
INSTITUTION	Maine State Dept. of Labor, Augusta. Bureau of Employment Security.
PUB DATE	Oct 84
NOTE	119p.; An earlier report on "Women and Minorities in Maine's Labor Force" was published in 1971.
AVAILABLE FROM	Division of Economic Analysis and Research, 20 Union Street, Augusta, ME 04330 ($4.50).
PUB TYPE	Statistical Data (110)
EDRS PRICE	MF01/PC05 Plus Postage.
DESCRIPTORS	American Indians; Blacks; *Employment; Employment Statistics; *Females; Hispanic Americans; *Minority Groups; Unemployment
IDENTIFIERS	*Maine; Native Americans

ABSTRACT

The 1984 issue of Women and Minorities in Maine's Labor Force is based on data from the 1980 census. The population findings from 1970-1980 are that there was an increase in women from 51.3% to 51.4% of the total population and a minority increase of 80.4%. Spanish ethnics grew by 30% in the population and Blacks by 17%; other minorities include American Indians and Asian Americans. There has been a significant increase in labor force participation by women from 1970 to 1980 (from 41.2% to 53.3%). Maine's working women are still concentrated in traditionally lower paying administrative support occupations which include clerical workers, service occupations and operatives, fabricators and laborers. Approximately 15% of all employed women are specialty workers, mostly in elementary and secondary education and medical and health work. Six percent of all employed women are executives, managers or administrators as compared to 12% of all employed men. The bulk of the document consists of tables which show figures for the general population, females, Whites, Blacks, American Indians, Asians, and Hispanics. The tables summarize general population and labor force characteristics, occupation and industry, and unemployment for the state as a whole, for three standard metropolitan statistical areas, the state's four largest cities, and 16 counties. ISSUED OCTOBER 1984

AUGUSTA, MAINE

PREFACE

Women and Minorities in Maine's Labor Force was first developed and published in 1971 "to help employers and others formulate effective Affirmative Action Compliance Programs." This first report included only the most basic decennial census data elements, as the 1970 Census of Population and Housing detailed statistics had not yet been released. The utility of the report increased each year in the 1970s as more data became available and the quality of the data improved. Initiatives taken by the Bureau of Employment Security, for example, led to the collection of data on the number of females employed by industry and the development of monthly female labor force estimates for the state.

The 1984 issue of *Women and Minorities in Maine's Labor Force* is based on data from the 1980 Census of Population and Housing. It provides the most comprehensive and up-to-date information on females and minorities in Maine and substate areas. In addition, a new companion publication *Maine Occupational Statistics for Affirmative Action Planning*, Volumes I and II, details 514 reported occupations of females and selected minorities for every county, SMSA, and city with a population of 50,000 or more in the state. Together these publications provide detailed statistics which extends both the utility and range of users to include such groups as training program planners, economic and industrial development specialists, and market research professionals.

If you have any questions, please contact the Division of Economic Analysis and Research, 20 Union Street, Augusta, Maine, or call (207) 289-2271.

SECTION I

OVERVIEW

The source of data in this publication is the 1980 Census of Population and Housing, unless otherwise noted. Tables in this report are arranged by geographic area, with Maine followed by sets of tables for the three Standard Metropolitan Statistical Areas (SMSAs): Bangor, Lewiston-Auburn, and Portland; the four largest cities: Auburn, Bangor, Lewiston and Portland; and the sixteen counties.

For each area, data is provided on the numbers of women and minorities in the population and labor force. Tables for population, labor force, workers by occupation, and workers by industry are presented by sex and race. Not all race groups appear on every table, since population counts of small groups are suppressed by the census to protect confidentiality. Data for particular racial groups with a population of fewer than 400 persons are suppressed.

I. Population 1970-1980

A. Women Maine's total population in 1980 was 1,124,660, an increase of 13.2 percent over the 1970 level of 993,663. The number of women in Maine increased from 509,590 to 578,571 over the decade. As a percent of total population, females increased from 51.3 percent to 51.4 percent.

B. Minorities Between 1970 and 1980 Maine's minority population increased dramatically from 9,431 to 17,014, or by 80.4 percent. The number of Spanish Ethnics grew by 30 percent and blacks by 17 percent. The increase in the number of American Indians was primarily due to an undercount in 1970. The Central Maine Indian Association and the Association of Aroostook Indians feel that the 1970 Census undercounted Maine's American Indian population by approximately 1,900. Between 1970 and 1980 there was also an increase in the number of Asian and Pacific Islanders in Maine, primarily refugees from Southeast Asia.

II. Labor Force

The labor force is defined as individuals 16 years of age or older who are either working or unemployed but looking for work. The civilian labor force includes only nonmilitary persons. When comparing the labor force to population, the noninstitutional population is used, as institutional persons are neither employed nor able to look for work. All of these factors serve to define the civilian labor force. Other terms frequently used include the labor force participation rate, which is the ratio of labor force to the civilian noninstitutional population age 16 and over. The unemployment rate is the number of unemployed as a percentage of the labor force.

The male labor force participation rate in 1983 was 73.4 percent; for females the rate was 53.3 percent. These figures compare to 73.9 percent for males in 1970 and 41.2 percent for females.

Clearly there has been a significant increase in the labor force participation of women, while the participation of men has remained virtually unchanged over recent years.

III. Workers by Occupation

The tables of workers by occupation provide a breakdown of 25 occupational groups, with further detail of the broader occupational groups provided in Appendix A.

Some users of affirmative action statistics may find a need for a more detailed occupational breakdown by race and sex. The Division of Economic Analysis and Research plans to publish Maine Occupational Statistics for Affirmative Action Planning in the fall of 1984. A sample of this publication and an order form are included as Appendix B.

With increased emphasis on affirmative action, one would expect significant changes in the types of occupations in which women are employed. However, Maine's working women are still concentrated in lower-paying traditionally female occupations, i.e., clerical, service, and operative (except transport) occupations. As the following tables indicate, Maine women are still relatively absent from such high-paying, traditionally male occupations as craftsworkers and transport operatives.

In 1980 about 62 percent of the 196,000 employed women in Maine were still employed in three major occupational groups: administrative support occupations, including clerical (25.8 percent); service occupations (19 percent) and operatives, fabricators and laborers, except transport occupations (17.3 percent).

About 15 percent of all employed women were professional specialty workers; of these, approximately three-quarters were employed as elementary and secondary school teachers and medical and health workers.

Women accounted for about 29 percent of all executives, managers and administrators. However, only 6 percent of all employed women were executives, managers or administrators compared to 12 percent of all employed men.

Fewer than 3 percent of Maine's working women were employed as craftsworkers and fewer than one percent worked as transport operatives.

IV. Workers by Industry

The tables of workers by industry provide a breakdown of 30 industry groups, with further detail of the broader industry groups provided in Appendix C.

ANNUAL AVERAGE CIVILIAN LABOR FORCE ESTIMATES
MAINE, 1983

Table 5

Civilian Noninstitutional Population, 16 Years Plus	853,000
Civilian Labor Force	536,800
Labor Force Participation Rate	62.9%
Employment	488,400
Unemployment	48,400
Unemployment Rate	9.0%
Male Noninstitutional Population, 16 Years Plus	408,900
Male Civilian Labor Force	300,300
Male Labor Force Participation Rate	73.4%
Employment	272,700
Unemployment	27,600
Unemployment Rate	9.2%
Female Noninstitutional Population, 16 Years Plus	444,100
Female Civilian Labor Force	236,500
Female Labor Force Participation Rate	53.3%
Employment	215,700
Unemployment	20,800
Unemployment Rate	8.8%
Male Noninstitutional Population, 20 Years Plus	367,200
Male Civilian Labor Force	276,700
Male Labor Force Participation Rate	75.4%
Employment	253,400
Unemployment	23,300
Unemployment Rate	8.4%
Female Noninstitutional Population, 20 Years Plus	403,300
Female Civilian Labor Force	215,000
Female Labor Force Participation Rate	53.3%
Employment	198,200
Unemployment	16,900
Unemployment Rate	7.8%
Noninstitutional Population, 16-19 Years	82,600
Civilian Labor Force	45,100
Labor Force Participation Rate	54.7%
Employment	36,800
Unemployment	8,300
Unemployment Rate	18.4%
